Twilley's
Selected Market Strains
and
Certified Tomato Seed

If you want a variety that will sell try Twilley's Selected Coker Watermelon. Note the unusual large size and fine appearance of Coker melons being loaded in this car.

OTIS S. TWILLEY
Certified Tomato Seed Grower
SALISBURY, MARYLAND

Twilley's Stokesdale

(Certified)

A Superior Strain Developed by Years of Selection

Stokesdale is planted with great success by many growers.

It is a second early variety, ripening about one week ahead of Marglobe and ten days earlier than Rutgers. The fruits grow the largest of the second early varieties. This large fruited habit with its earliness, makes it an excellent variety for the early variety. The perfect globe fruits are very handsome in appearance, and pack and ship well.

The fruits have the same globe shape as Marglobe and Rutgers.

The foliage is not as heavy as the Marglobe and Rutgers, being more sparse, which is true of all second early varieties. Stokesdale often outyields all second early varieties, and in some seasons yields more than Marglobe and Rutgers because of its heavy set of fruit. This variety should be well fertilized.

Prices: STOKESDALE (Certified)—Oz. 50c; ¼ lb. \$1.75; ½ lb. \$3.00; 1 lb. \$5.50; 5 lbs., \$5.00 per lb. Postpaid.

Drying Tomato Seed. Note the large, clean seed. We use unusual care in cleaning and drying Twilley's Certified Tomato Seed.

Pan-America Tomato

A New Wilt Resistant Variety

The seed of this new variety was given us by the United States Department of Agriculture. The description that follows is that of the Department of Agriculture.

"The Pan American tomato is a mid-season red fruited variety highly resistant to Fusarium wilt. It appears to be suitable for marketing fresh tomato, particularly in regions where the soil is heavily infested with the Fusarium tomato wilt fungus. As grown at the U.S. Horticultural Station, Beltsville, Maryland, the Pan America tomato produces an excellent yield of scarlet fruits that develop exceptional polar depth, typically weighing 6 to 7 ounces each. The internal color is bright scarlet red. The flesh is firm and the seed cells relatively small."

We grew this variety for the first time in 1941. In our trials and seed fields the season was the same as Marglobe. The vines were exceptionally healthy, strong and vigorous. The foliage good, although the vines seem to open just a little more than Marglobe. The fruits all run exceptionally smooth and very pretty globe shape. They pack and carry very well.

If you are having trouble with your vines going down because of wilt we are confident this variety will hold up much better than almost any other variety. The vines are certainly resistant to wilt in this section. All seed is hand saved.

Prices: PAN AMERICA—Oz. 75¢; ¼ lb. \$2.50; ½ lb. \$4.50; 1 lb. \$8.50; 5 lbs., \$8.25 per lb.; 10 lbs., \$8.00 per lb. Postpaid.

Twilley's Selected Rutgers

(Certified)

One of The Finest Strains Offered Tomato Growers

Twilley's Selected Rutgers picked for seed from one of our Certified Seed fields. The large size is due to our selection. This quality is what you may expect from Twilley's Selected Rutgers.

LARGE SIZE

You will like Twilley's Selected Rutgers. The globe shape fruits are much larger than other globe varieties. For nearly ten years we have selected for large size. For this reason Twilley's Rutgers continues to hold up in size throughout the picking season, instead of running down in size like other varieties.

HEAVY CROWN SET

The crown set is heavy. An Experiment Station reported Twilley's Rutgers ripened more early fruits than any other strain of Rutgers in trial, and still produced a larger yield than any other strains.

VIGOROUS PLANTS

The vines are vigorous and strong, holding up until the end of the season, and therefore produce larger yields of better quality fruit than most varieties. Southern growers in all sections, and on every kind of tomato soil, have always liked Twilley's Rutgers because of its ability to grow well and produce large yields. Photos and descriptions of outstanding tomato crops grown from Twilley's Seed have appeared in Southern farm papers.

SMOOTH FRUIT

We have made careful selections to improve Twilley's Selected Rutgers, especially in smoothness and uniformity of fruit. At a leading Eastern Experiment Station, in which practically all the leading seedsmen entered their seed, Twilley's Rutgers produced more perfect fruits than any other variety on trial. Such a strain is valuable for a good pack of first class fruit.

Twilley's Selected Rutgers is so popular with all who have grown this variety that we sell more seed every year. The seed is certified, treated and packed in sealed containers.

Prices: SELECTED RUTGERS—Oz. 50c; ¼ lb. \$1.75; ½ lb. \$3.00; 1 lb. \$5.50; 5 lbs. \$5.25; per lb.; 10 lbs. \$5.00 per lb. Postpaid.

Hales Best Jumbo Special

Hales Best Jumbo SPECIAL piled ready to cut for seed. These melons run longer from stem to blossom end than the photo seems to show.

A MONEY VARIETY

This has always been a leading money variety ever since its introduction. It is increasing in popularity in recent years in many melon sections. There are several reasons for this continued popularity; it is early; it is large; it is high yielding.

LARGE SIZE

This is the largest of the Hales Best varieties. It is a leading roadside variety, and very popular for bulk or truck trade. While not as uniform in size and shape as Hales Best No. 936, or other Hales Best types, it is popular in many sections where all the melons are crated because of its large size. Under good conditions melons average about $6\frac{1}{2}$ x 6 inches, and weigh about $4\frac{1}{2}$ pounds.

WELL NETTED

As shown by the photo this melon is covered with a heavy net. A characteristic of Hales Best Jumbo is the distinct stripe or suture running from the stem to the blossom end, but practically without ribs. This stripe or suture causes the melons to appear larger in size.

SHIPPING QUALITIES

From its introduction Hales Best Jumbo rated one of the best shippers, whether crated for long distance, or in bulk for truck trade. The deep colored salmon flesh is thick, sweet flavored, and of fine eating quality. Many experienced shippers believe that it holds up in quality and keeps longer than other Hales Best types.

HIGH YIELDING

High yields is one of the qualities that has put this melon over in a big way with growers. When properly fertilized the vines make a hardy and vigorous growth. If you have proper fertility and a good season you will get real size and yield from this variety.

HAND SAVED SEED

We offer hand saved seed. This requires more exense, but it is real economy for you. We are most sure you will like Twilley's Hales Best Jumbo.

Prices: HALES BEST JUMBO—Oz. 20c; $\frac{1}{2}$ lb. \$1.25; 1 lb. \$2.40; 2 lbs. \$2.35 per lb.; 5 lbs. \$2.25 per lb.; 10 lbs. \$2.20 per lb. Postpaid.

Schoon's Hard Shell Bender

A Good New Variety

ORIGIN

Schoon's Hard Shell Bender is reported to be a cross between Bender's Surprise and Honey Rock. The shape and appearance of the melons are much like Pride of Wisconsin or Queen of Colorado, but are larger in size. Bender's Surprise has always been famous for its large size and excellent quality, but does not have good shipping qualities. This new variety, Schoon's Hard Shell Bender, has even better eating quality than Bender's Surprise and is a very good shipping variety.

Schoon's Hard Shell Bender has a hard, tough rind, with deep heavy netting like this photo shows. The melons make a fine appearance.

EXTRA LARGE SIZE

Under good conditions the melons weigh 5 to 7 pounds and measure 8 by 7 inches. We do not consider it as uniform in size as the other varieties we offer, but it packs well. The melons are oval in shape and pack well either in crates or flats.

GOOD SHIPPER

Note the single melon on this page, and you will observe this variety has a heavy, hard net. The rind is thin, but hard and tough. It has excellent keeping qualities. These features make it a good shipper. I live in one of the largest melon growing sections of the United States, and growers find this a money variety because of its large size and good market quality. The flesh is very thick, deep salmon in color, and makes a fine appearance when cut.

Many seed firms list this variety as maturing with the Hales Best varieties, but it actually matures about 5 to 7 days later. If you sell locally your customers will like the quality; if you ship your commission man will like the quality and appearance; if you sell to bulk trade the buyers will like the large size and quality.

Prices: HAND SAVED SEED; Oz.
30c; 1/4 lb. 80c; 1/2 lb. \$1.50; 1 lb. \$2.50;
5 lbs. \$2.40 per lb.; 10 lbs. \$2.25 per
lb. Postpaid.

Twilley's Improved No. 936

LARGE SIZE

You will like the large melons produced by Twilley's Improved No. 936. This is a Jumbo size variety, producing larger melons than the original H.B. No. 36. Under good growing conditions, the bulk of the crop will pack Jumbos; the size that brings top money.

UNIFORM SHAPE

Improved No. 936 is the most uniform large size Hales Best variety yet developed. When you walk into a well grown field of Improved No. 936 you are impressed by the even and uniform shape of the melons. The shape is nearly round or globular. The melons are easy to pack, and make a fine market appearance.

HEAVY NET

Under good growing conditions a perfect net covers all the melon so thick and firm that no ribs or sectors show. The entire surface of the melon is even and smooth.

GOOD SHIPPER

The variety has been carefully selected for good eating and shipping qualities. The salmon flesh is very thick and solid, with small seed cavity, and of fine flavor. These qualities, with its uniformity and heavy net, make it one of the best shipping melons yet introduced.

VIGOROUS GROWER

The vines are hardy and vigorous. Properly fertilized this is a very high yielding variety. Time after time we have visited fields grown from Twilley's Improved No. 936 and had growers show us large crops of which they were exceptionally proud.

HAND SAVED SEED

We offer hand saved seed. This method of saving seed is expensive, but it is one more assurance of the quality offered in Twilley's Improved No. 936.

Prices: Ounce 25c; ¼ lb. 75c; ½ lb. \$1.35; 1 lb. \$2.40; 2 lbs., \$2.35 per lb.; 5 lbs., \$2.30 per lb.; 10 lbs., \$2.25 per lb. Postpaid.

The New Purdue 44

An Excellent Disease Resistant Melon

ORIGIN Purdue 44 is a new variety. It was developed by the Purdue Agricultural Experiment Station at Lafayette, Indiana which supplied us with seed. Purdue 44 was developed from the Hale's Best strains, and the fruits have the same appearance and mature at the same season as Hale's Best 36; No. 936; New Seed Breeders; Mildew Resistant 45, and similar varieties.

DISEASE RESISTANCE This variety has great resistance to Alternia leaf spot, one of the most destructive

Hand saved seed from Purdue 44. Note the uniform shape, and heavy net of this variety.

diseases of melons in the South, East and Midwest. It is not resistant to other leaf diseases, or any other disease affecting melons. However, in tests by the Purdue Station it showed remarkable drought resistance, and we found it grew exceptionally well under dry conditions the past season. Alternia leaf spot is a disease of cantaloupes that seriously affects the crop by making the plants "fire at the hill," and lose most of their leaves when the fruit is maturing. Purdue 44 is resistant to this disease.

HIGH YIELD

In tests by the Purdue Agricultural Experiment Station, Purdue 44 produced as many as 42 per cent more marketable melons in some years than the original variety from which it was selected. In other years the difference in yield in favor of Purdue 44 was not as great. Our plantings of this variety held up much better and picked longer than other fields of Hale's Best strains in the same vicinity.

SHAPE OF MELONS

The melons are uniform in size, nearly round in shape, and run about the same size as Hale's Best No. 36 and Seed Breeders. All the melons we grew were of good size as the photo shows. The netting is heavy, and the melons make an attractive appearance.

GOOD QUALITY

This variety is equal in every respect to any well selected strain of the Hale's Best types. We sold some of these melons to a huckster who has an established route. He said, "The people just swarmed over me when I went back with a second load of these melons". We found this variety to be all that can be desired in thickness of flesh, firmness, and good eating qualities.

Prices: PURDUE 44—Oz. 35c; ¼ lb. 85c; ½ lb. \$1.50; 1 lb. \$2.75; 2 lbs. \$2.60 per lb.; 5 lbs. \$2.50 per lb.; 10 lbs. \$2.40 per lb. Postpaid.

Marketeer Cucumber

A New Variety of Great Merit

The best market variety since A & C and Colorado. The intense dark green color runs down to the blossom end. Marketeer grows very uniform in size and shape.

NEW VARIETY Marketeer is a new slicing or market cucumber of great merit. It is intensely green, with the dark green color running down to the blossom end. The last pickings are as dark green as the early pickings. The fruits grow more uniform in size and shape than most market varieties, a feature that makes it very popular with produce buyers. This variety is a cross between Straight-8, one of the best varieties ever developed for uniform size and smooth fruits, and A & C, one of the best varieties for good color. Marketeer has the good points of both these varieties.

HIGH PERCENTAGE OF MARKETABLE FRUITS Growers find that Marketeer produces very few crooks, nubbins, or culls. This is one of the principal reasons that Marketeer is becoming so popular. Fruits grow about 8 inches long, and are more slender than A & C and Colorado. Many growers report that Marketeer seems to withstand intense heat late in the picking season better than other varieties.

SETS LARGE NUMBER OF FRUITS Even under fair growing conditions, Marketeer sets a large number of fruits. It seems to set a large number of new fruits more rapidly after picking season starts than other market varieties. For this reason the early yield of Marketeer is frequently greater than other market varieties. Marketeer is the leading new variety because of its outstanding merit. We strongly recommend that you try this variety.

"I am very much pleased with your Marketeer cucumber. It produces extremely well, and makes a real nice pack of uniform size. It is very dark in color, and has few culls or crooks." Coile Albritton.

"Your cucumber seed gave the highest yield I have ever seen. I bought all the cucumbers one grower had under irrigation, and from only two acres he picked over 2,000 bushels." Jesse Hiott, Produce Dealer.

"I have grown all the different varieties of cucumbers you offer, but from now on I want your Marketeer. You can't beat this variety for yield and color." O. P. Butler.

Prices: **MARKETEER**—Oz. 35c; ¼ lb. \$1.00; ½ lb. \$1.75; 1 lb. \$3.25; 5 lbs. \$3.00 per lb. Postpaid. Very short crop.

Twilley's Colorado Cucumber

One of The Most Dependable Varieties

Twilley's Colorado as grown by a successful grower. Note the vigorous and even growth over the entire field. This is the quality you may expect, under good conditions, from Twilley's Seed.

Twilley's Colorado is a favorite with many successful cucumber growers from Florida to New York. It is an excellent variety in every respect.

Altho there is very little difference between Twilley's Colorado and A & C; many growers believe Twilley's Colorado is somewhat darker in color.

The picking season and size of Twilley's Colorado is the same as A & C. A great many growers believe the Colorado is somewhat better shaped at the stem end, as they consider it a little less tapering or pointed.

This variety has the shape, color, and large size fruits necessary to make a most attractive pack. We sell Twilley's Colorado for growing "trough" cucumbers in the irrigated sections of the south for open field culture, and to experienced growers in all sections of the country.

It is one of the most dependable shipping cucumbers; you may plant it with confidence.

Our Business Was Started By Supplying Seed Of Superior Quality To Our Neighbors. Gradually Demand For This Seed Increased, And Today Growers In Twenty States Plant Twilley's Seed.

We Are Always Looking For Better Strains. If You Are Using, Or Know Of Any Superior Strains, Please Get In Touch With Us.

This customer is well pleased with his crop grown from Twilley's Cucumber Seed. Note the slender, even, smooth fruits produced by this grower.

Prices: TWILLEY'S COLORADO— $\frac{1}{4}$ lb. 80c; $\frac{1}{2}$ lb. \$1.50; 1 lb. \$2.75; 2 lbs. \$2.60 per lb.; 5 lbs. \$2.50 per lb.; Postpaid.

Selected Coker Watermelon

Also Known As Garrison

If you want a variety that will sell try Twilley's Selected Coker Watermelon. Note the unusual large size and fine appearance of Coker melons being loaded in this car.

This is one of the newer varieties, and is the most attractive of all melons. Several years ago I collected samples of all watermelon varieties grown for market in the East, Midwest and Southwest. Of about 40 varieties Coker was the most attractive of all; really a beauty for appearance. It is a large melon; note the size and fine appearance of the melons being loaded in this car.

Not only is Coker the leader for appearance, but it is, in my opinion, the best melon for eating quality. A doctor tells me that to his knowledge it is the only watermelon that does not cause "heart burn" or digestive disturbances that some people experience from eating watermelon. My family would rather eat Coker than any variety we ever had in trial or production. The flesh is more free from fiber and sweeter than any variety we have ever known. Just a word of caution regarding the quality of this variety; it should be carefully handled all during harvest and shipment as it is a tender and brittle melon due to complete lack of any toughness. When you draw a knife through a ripe Coker it just cracks open.

Be sure to fertilize Coker well, as this variety will not grow its best unless well supplied with plant food. During periods of hot, dry weather it sometimes has a tendency to produce more "bottle necks" than other standard long varieties like Tom Watson. But every grower who does not have watermelon wilt in his soil will find this a sure hit for quality and money on the market. You may accept our word regarding the appearance and quality of Coker. It is by far the leading variety in many sections. We have never had enough seed to go around.

Prices COKER WATERMELON—Oz. 30c; ¼ lb. 80c; ½ lb. \$1.50; 1 lb. \$2.50; 5 lbs \$2.25 per lb. Postpaid.

Twilley's Wilt Resistant Dixie Queen Watermelon

An excellent crop of Twilley's Wilt Resistant Dixie Queen grown on land so severely infested with wilt that the previous crop was a complete failure. This grower did not lose a plant of Wilt Resistant Dixie Queen in the entire field.

WILT RESISTANCE

We offered this variety for the first time last season. Every grower reported that he did not lose any plants from wilt when planting Twilley's Wilt Resistant Dixie Queen. The grower whose photo appears here said, "I wanted to give your Wilt Resistant Dixie Queen a good test, so I planted a field in which I have not been able to grow watermelons for many years. I did not lose a plant in the entire field, and the melon buyers said that my crop ran the most uniform in size of any they noticed the past season".

HIGH YIELD

The fact that this is a wilt resistant strain insures a good yield on most soils that are adapted to melon growing. Careful selection has been made for a high yielding strain, and under good conditions this variety will yield exceptionally well. We believe that it withstands drought better than the ordinary strain of Dixie Queen.

UNIFORMITY

One of the qualities that our growers like about Twilley's Wilt Resistant Dixie Queen is the great uniformity of the melons. All of us know that there are many conditions in the same field that make melons vary in size, but under average good conditions you will find this variety to produce melons so uniform that they are very easy to grade and load. Naturally, the market appearance is improved by such uniformity. A southern grower reported "My commission man said the melons I grew from Twilley's Wilt Resistant Dixie Queen were the finest that came on the Washington market."

Prices: Oz. 30c; ¼ lb. 75c; ½ lb. \$1.35; 1 lb. \$2.50; 2 lbs. \$2.40 per lb.; 5 lbs. \$2.25 per lb.; 10 lbs. \$2.20 per lb. Postpaid.

Early Prolific Straightneck Squash

Plant This Variety to be First on the Market

ORIGIN

This strain is a distinct improvement selected from the Giant Straightneck variety.

EARLINESS

Matures about ten days earlier than other strains of Straightneck squash. First on the market.

HIGH YIELD

More productive than other strains of Summer Straightneck. It produces more fruits to the plant. Since it sets faster than other strains more of the crop can be sold on the early market.

PLANTS

Bushy and compact which permits close planting so larger yields are possible. Ample foliage, altho growth is not as large as the Giant Straightneck variety.

FRUITS

More smooth, much more uniform and brighter yellow color than other strains. The fruits grow very straight. There is not a trace of green color even in the very young fruit. The quality is unsurpassed.

MARKET

Considered by both northern and southern growers as the best ever developed for market. Our seed is very true to type. You may give it a thorough trial alongside any seed you are now using.

Prices: EARLY PROLIFIC STRAIGHTNECK SQUASH— Oz. 20c; ¼ lb. 50c; ½ lb. 80c; 1 lb. \$1.50; 5 lbs. \$1.40 per lb. Postpaid.

Wilt Resistant Hawkesbury

An Excellent Wilt Resistant Melon

We liked Hawkesbury the first time we grew this variety, for it certainly has real vigor. In our opinion Irish Grey, Thurmond Grey, Burrell Grey and other varieties of this type should be discarded in favor of Hawkesbury if you are troubled with wilt. Wilt Resistant Hawkesbury has proved its ability to grow and produce large crops on wilt infected land where all other varieties die. It is one of the best wilt resistant varieties ever introduced.

Hawkesbury is well known and widely grown. It is a good shipper, and sells well, both among the produce buyers and in the retail markets. Its light grey-green rind makes a distinctive appearance. The rind is tough, but the red flesh has fine eating qualities, with no trace of hard or white hearts. Plant Hawkesbury if you are having trouble with wilt.

Prices: Ounce 20¢; ¼ lb. 60c; ½ lb. \$1.00; 1 lb. \$1.75; 2 lbs., \$1.65 per lb.; 5 lbs., \$1.60 per lb.; 10 lbs., \$1.50 per lb. Postpaid.

Early Yellow Summer Crookneck

SPECIAL STOCK

This is generally considered the best of the Crookneck Squashes. About one week earlier than the old type Summer Crookneck. The plants are very prolific, and if the fruits are picked as soon as ready for market, the plants continue to make a heavy set.

Fruits are curved at the neck, light yellow at early eating stages, turning golden with age, and moderately covered with warts. Matures in about 52 days under favorable conditions. Strains of this variety are also sold as Baby Crookneck and Dwarf Summer Crookneck. We offer a fine strain of this variety.

Prices: **EARLY YELLOW SUMMER CROOKNECK**— Oz. 20c; ¼ lb. 55c; ½ lb. 80c; 1 lb. \$1.50; 5 lbs. \$1.40 per lb. Postpaid.

Green Top Early Wonder Beet

Handsome Green Tops --- Smooth Red Roots

ORIGIN This strain is a distinct improvement selected from the Early Wonder variety.

EARLINESS In all sections, and under practically all growing conditions, Early Wonder is recognized as the earliest good market variety. Perhaps only one variety is earlier, the old Early Flat Egyptian, no longer used. There is something about Early Wonder that makes it come thru in the spring for the early market.

GREEN TOPS This variety has attractive bright green tops which do not have the tendency to turn red or brown when grown in cool weather.

MARKET QUALITIES Roots are globe shaped as shown by the photo, and grow very uniform in size and color. The collar or shoulder is neat and clean, and the tap root is small. Tops are slightly taller than the original Early Wonder. The erect green tops, and the good color of the roots make this variety have excellent market appearance. Recommended for shipping and local market trade, also a good variety for late planting. You may have complete confidence in this strain.

Prices: Oz. 20c; ¼ lb. 55c; ½ lb. 90c; 1 lb. \$1.75, 2 lbs. \$1.70 per lb.; 5 lbs. \$1.65 per lb. Postpaid.

Perfected Detroit Dark Red Beet

SPECIAL STOCK

Twilley's Perfected Detroit Dark Red as grown under irrigation by a customer.
Note the good yield, and the strong erect tops.

For the average grower, Perfected Detroit has more good qualities than any other variety. It is superior in dark red color. Grows 95% true to exactly the same shade of dark red, and does not show any white rings. Beets are globe, very smooth and uniform. This strain has a strong erect top that makes it show up well as a bunch beet. If grown in soil that becomes hard or bakes, it has strong enough top to pull well. The beets retain their dark red color and good quality if left until fully grown. Excellent for a bushel or basket variety. Unsurpassed for bunching, canning, or long distance shipping.

Prices: Oz. 20c; ¼ lb. 55c; ½ lb. 90c; 1 lb. \$1.75; 2 lbs. \$1.70 per lb.; 5 lbs. \$1.65 per lb. Postpaid.

Special Detroit Dark Red Beet

Uniform Roots --- Finest Quality

DARK RED ROOTS

red meat.

Of all varieties Special Detroit has the most perfect color. The flesh is so red that the roots seem a solid ball of blood

UNIFORM SHAPE

This strain is perhaps the best of all varieties for uniformity of size and shape of roots, also for uniformity of height and color of tops. Note the beets in this photo, as pulled in the field, are free from side roots, and have a very small tap root. You can see that when washed they make a fine appearance. Very easy to bunch because of uniform size.

SUGGESTED CULTURAL METHODS

After observing this beet growing in many sections we recommend that you do not plant it on heavy land that bakes hard during long periods of dry weather. This strain has a small top, and under such conditions is sometimes difficult to pull if the beets are allowed to become large and fully mature. The tops of Special Detroit, when fully grown, are 12 to 15 inches as compared to 16 to 20 inches for Perfected Detroit. On loose soils, and under irrigation, this variety cannot be surpassed for all around quality.

Prices: Oz. 20c; ¼ lb. 55c; ½ lb. 80c; 1 lb. \$1.75; 2 lbs. \$1.70 per lb.; 5 lbs. \$1.65 per lb. Postpaid.

Morse's Bunching Carrot

ORIGINATOR'S STRAIN

Note the long slender shape of Morse's Bunching Carrot. This variety has the best market appearance of all bunch carrots.

An outstanding variety, developed to meet the demand for a long, smooth, handsome bunching carrot. This is the fine bunch carrot grown in California and found on the Eastern Markets. It grows well on any soil suited for good carrot culture. Medium top, but strong enough for good bunching.

Mature roots will reach 8 inches long or better, 1½ to 2 inches at the shoulder. The color, both exterior and interior, is a fine deep red. The core is small; excellent eating quality. Roots are smooth, free from hair roots, and wrinkles.

From the photo you can see that for a long carrot it has a good blunt end. There are other varieties of long bunch carrots, but for smoothness and market appearance we find in our trials this to be the finest of them all. Matures in 77 days.

Prices: Oz. 25c; ¼ lb. 70c; ½ lb. \$1.10; 1 lb. \$2.00; 2 lbs. \$1.95 per lb.; 5 lbs. \$1.90 per lb. Postpaid.

Special Long Chantenay Carrot

PLANT THIS VARIETY TO BE
FIRST ON THE MARKET

EARLINESS This is the earliest good market variety by three days, with possible exception of Nantes. Matures in 70 days.

VIGOROUS GROWTH For making a good early growth under a wide range of soil and climatic conditions, Chantenay is perhaps the equal, or best of all commercial varieties.

LENGTH OF ROOTS The roots run from one to 1½ inches longer than the regular Chantenay. This characteristic gives Long Chantenay its superior market appearance.

MARKET QUALITIES A smooth skinned strain developing good color early in its growth. Tops are shorter than old type Chantenay. The roots at mature bunching stage resemble the Emperor variety, but reach this stage about 7 to 10 days earlier. Makes a better market appearance than regular Chantenay. One of the most dependable of all varieties for good crops and high yields.

Prices: Oz. 20c; ¼ lb. 55c; ½ lb. 80c; 1 lb. \$1.75; 2 lbs. \$1.70 per lb.; 5 lbs \$1.65 per lb. Postpaid.

Twilley's Seed Improvement Grounds

● Whenever possible you should become personally acquainted with your seedsman; note his methods of growing seed, and see his varieties growing in the fields.

Write me letters about anything you have in mind, no request or idea is too modest for me to give my full attention.

Selecting the Best Strains in Twilley's Seed Improvement Grounds
For Further Development.

Some day the coming summer we want you to be sure to visit Twilley's Seed Trials and Improvement Grounds. You will see much that will interest you. There will be hundreds of trials of cantaloupes, cucumbers, watermelons, tomatoes, peppers, beans, squash, hybrid corn, eggplant, and other crops.

To show how extensively we search for better strains and varieties for your use, it would be necessary to travel over 15,000 miles by auto to personally collect samples of all the different strains and varieties that will be planted in our trials this year. Our work in seed selection is widely known.

OTIS TWILLEY says:

"Let's Have A Friendly Seed Talk"

You and I are interested in good seed so lets talk seed. I was born and raised on the farm.

After a time got interested in growing and selling seed, and became acquainted with some of the folks in the United States Department of Agriculture and the Maryland Experiment Station. Found these men knew a lot I didn't know so told my father, to whom I owe my interest in good seed, that I was going to the Maryland College of Agriculture. After graduation, back in 1921, I kept on growing seed. Don't know how I did it, but pretty soon folks from the Gulf States to New York were writing in for Twilley's Seed. Been at it ever since, and like it.

Here is an important thing about buying Twilley's Seed. When you order seed I do not think of selling you a pound of seed, for so much money; instead I think of sending you a good start for your crop. Taking chances out of seed buying is my obligation to every one of my customers.

If your are in this section be sure to visit Twilley's Seed Improvement Grounds. We will be glad to show you our seed fields.

OTIS S. TWILLEY
Breeder and Grower of Selected Seed
SALISBURY, MARYLAND
